CHOKING HAZARD – small parts & long cord
Do not give components or completed projects to young children.

Weaving Set

Your Set contains:

- Plastic weaving loom
- Plastic weaving hook
- 150 polycotton loops

How to Weave:

1. Stretch loops across the loom placing one loop on every pair of pegs (diagram A). You can create different designs by changing the arrangement of the coloured loops.
2. Once you have completed placing a total of 18 loops across the loom you are ready to start weaving in other direction. Weave contrasting coloured loops by placing them over and under the loops already in place on the loom (diagram B). You can use your fingers to weave the loops. The last few loops may be hard to weave – use the weaving hook to help pull the loops through to the other side of the loom. You need to make sure that the loops are tightly woven and there are no spaces in your weaving – keep pushing down the completed weaving with your fingers.
3. When you have finished weaving and covered all pegs, do **not** remove the weaving from the loom until you have finished the edges.
4. To finish your weaving start by pulling a corner loop (loop 1) off its peg with the weaving hook (diagram C). Keep the loop on the hook and then carefully lift the loop to its left (loop 2) on to the hook. Using your fingers, lift loop 1 and pull loop 2 through it. You will now have one loop on your hook.
5. Now take the next loop to the left (loop 3) and pull it through loop 2. Continue lifting and pulling the loops always taking the loop to the left and remember to keep tightening the loops as you go. When you come to the last loop, stretch it so that it forms a hanging loop.
