

# Lavender Lamb Activity Arch & Quilt

**Caution:** The poles when bent have a natural "spring" that forms the structure of the arch. Care should be taken when assembling or disassembling the arch to ensure that the ends of the poles do not cause injury.

## INSTRUCTIONS:

1. Slide a connector onto one pole to a central position.
2. Slide the second pole into other hole in the connector to form a cross.
3. Slide a connector onto each of the four ends of the poles.
4. Connect the clips at the ends of the poles to the clips found inside the pockets on the underside of the Lavender Lamb's legs.
5. Put the buttons through the button holes on the straps as a secondary connecting device.
6. Put the hanging rings through the button hole tapes on the activities and attach to the connectors.
7. Adjust positioning as required by sliding the connectors along the poles.
