

instructions - search methods

1

To extend the detector, release the locking tab, extend to desired length and lock tab.

2

Sweep the loop close and parallel to the ground.

Keep loop flat to the ground as you sweep

3

The loop must be in continuous motion (moving from side to side) in order for the detector to reponse to metals. if the loop is held stationary, the detector may not respond.

4

when metal is detected, a "BEEP" tone will be heard and the "RED" LED is OFF. You could feel the vibration.

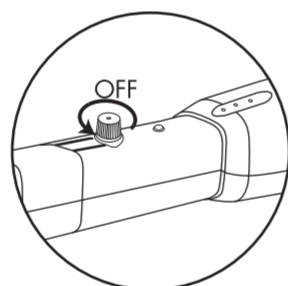

Detection Ranges (approximate):
 For Ring - 30mm
 For Key - 40mm
 For Watch - 50mm

where to search

- Use your imagination, valuables can be found anywhere people have gathered, lived, walked and played.
- Obtain permission to search private property.

storage

- When the detector is not in use, make sure the control knob is turned to the "OFF" position.
- Remove the battery from is compartment if you plan on storing the detector for long.
- Store the detector indoors in a dry area.

parts checklist

instructions - battery

1

Open battery compartment using a cross-point screwdriver in an anti-clockwise direction.

2

Install the battery noting carefully the correct (+) and (-) positions.

3

Close battery compartment in a clockwise direction.

before you start - sensitivity calibration

1

Turn the control knob clockwise towards "ON" direction, until long "BEEP" tone is heard and "RED" LED is OFF. You could feel the vibration at the same time.

2

Then turn the knob anti-clockwise slowly until the "BEEP" tone is OFF and "RED" LED is "ON". The sensitivity calibration is finished. You could start now.
