### how to play

#### Game preparation

Before beginning the game, the horses are placed in the paddock, each rider is placed in the cottage of the same colour and the golden apple is placed on the field in the mountain of gold.

#### How to play

The youngest player throws the dice. Depending on the colour throw, he or she places his or her rider on the next square of that colour along the route. It is now the next player's turn.

To leave the path and enter the paddock to go to your horse, you must throw the colour green. If your rider is standing on a red square for example and the green colour comes up on the dice, you may go directly to your horse in the paddock; however, if your rider is standing on the last square on the path, you may throw the dice three times.

On reaching the meadow, the rider mounts the horse of the same colour and sets off on the route to the golden apple. When a horse reaches a blue square with water or a field with a flower, the player must miss a turn to let his or her horse drink or eat. Send a rival rider back to the paddock by landing on the same square as them.

#### How to win:

The winner is the first to reach the field with the golden apple.
